

Record whiteboard notes to your handheld computer!

Presentations

2003
STANDING OVATION AWARD

eBeam is the ultimate wireless communication and presentation technology for presenters, consultants, administrators and educators.

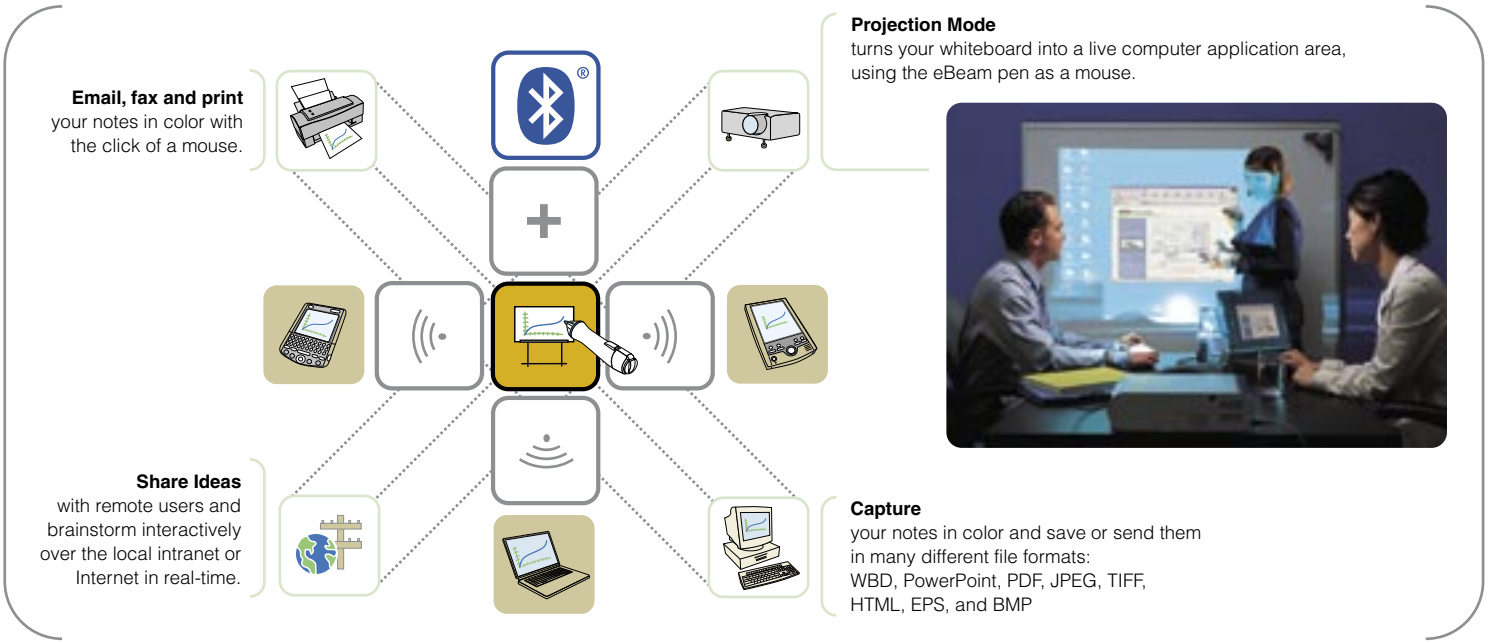

The wireless eBeam System 3 (USB and Bluetooth) allows users to connect their Bluetooth-enabled PC or Macintosh Computer as well as their Palm or PocketPC handheld wirelessly to any standard whiteboard.

Save handwritten notes, share images and drawings over the Internet or connect a projector and transform your whiteboard into an interactive touch screen. eBeam does it all!

- **Works with Pocket PC, Palm OS®, Windows® and Mac® OS!**
- **Connect to almost any Bluetooth® enabled computer!**
- **What you see is what you get – in real-time!**
- **Easy to install in minutes – simple USB or Bluetooth connection!**
- **Portable and light weight – take it with you!**
- **Uses standard dry erase markers!**

Bluetooth®

What is Bluetooth? Bluetooth is a radio technology developed to deliver short-range wireless mobility. Bluetooth technology eliminates cables, wires, and cords between devices such as your computer and input systems like eBeam. Bluetooth enables communication between devices that are in close proximity (up to 30ft) to one another. Bluetooth facilitates fast, low-powered, secure transmission of data, even when the devices are not in line-of-sight. For more information visit www.bluetooth.com

Bluetooth Certification

- FCC: Part 15, Class B
- Bluetooth 1.1
- Frequency: 2.4GHz
- Serial Protocol

Radio Range

- Up to 30 ft (10 m)

eBeam System Performance:

- Active area: 1.7' x 1.1' (0.43m x 0.28m) minimum, up to 8' x 4' (2.40m x 1.20m) maximum [equivalent to 107" diagonal]
- Positional resolution: +/- 1.5mm
